Non-IEM Member: RM 50

Speaker:
Mr. Suraj Singh Shergill

Moderator:
Assoc. Prof. Ir. Dr. Tan Chou Yong

*This event is organized by:
Material Engineering Technical Division
(MaTD) & Oil, Gas, and Mining
Technical Division (OGMTD)*

Synopsis

Health and Safety is a very crucial aspect in the Oil and Gas industry. As the phrase goes, there is no work that urgent that it cannot be done safely speaks for itself. As the industry has progressed and developed, the HSE requirements as well has become more stringent. With the proper training and equipment, we can keep ourselves safe while working in this industry as long we have the awareness and implement this mindset. Hence it is very important for us to learn the safety culture and understand its importance. A key factor of a successful project in the industry is to ensure it was executed safely.

About the Speaker

Suraj Singh Shergill is currently an engineer with Schlumberger with 11 years of working experience in the industry. He graduated with a degree in Mechanical Engineering from University Tenaga Nasional in 2011. He joined Schlumberger as a junior engineer under the Wireline department in 2012 and have done various positions in the company since then.

With over 7 years working experience offshore, he has a good hands-on technical knowledge before moving to an office-based role. He currently is doing a technical engineer role under the Reservoir performance segment and based in Kuala Lumpur. Throughout his working career, he has been involved very actively in the Health and Safety planning and understanding the importance of it.
