*MIP members to register via MIP website at: <https://forms.gle/aLFrgV5F9EAjKVFn6>

Speaker/host
TPr. Amelia Neoh

Speaker/host
Ir. Ong Sheng How

Synopsis

What is Active Mobility? How do you commute to work or get around your neighbourhood everyday? Is it affordable, accessible, safe and equitable for you and your loved ones?

Join us for our very first Technical Walkabout around the streets of George Town, Penang, entitled “**MIPNB-IEMPG Active Mobility Walkabout 2022**”, held in collaboration between Malaysian Institute of Planners Northern Branch (MIPNB) and The Institution of Engineers, Malaysia Penang Branch (IEMPG). TPr. Amelia Neoh (MIPNB) and Ir. Ong Sheng How (IEMPG) will be your hosts and walking guides for the day - both enthusiasts of Active Mobility.

In this Technical Walkabout, our main focus is to observe, discuss, critic and propose what makes a good pedestrian walkway. We encourage everyone (yes, that's you) to talk about how this relates to your neighbourhood, communities and cities. We encourage all our participants to take photos and videos, as we walk along the walkways of George Town. #ActiveMobilityWalkaboutPenang

Your hosts will share practical knowledge and experiences of walking, cycling and riding public transport from urban planning and transportation engineering perspectives. Intertwined between these discussions are opportunities to review existing pedestrian infrastructures, public spaces, and public transport facilities and its surroundings. We will then explore how walking can contribute to sustainable, resilient, equitable, prosperous, safe and healthy city planning for people – the elderly, OKU, children, women and neurodiverse – leaving no one behind.

Register with us, Today!

About the Hosts/Speakers:

TPr. Amelia Neoh is a Professional Town Planner with a multi-disciplinary consultancy firm based in Penang, Malaysia. She holds corporate memberships with both the Malaysian Institute of Planners (MIP) and Malaysian Board of Town Planners (LPBM). She has a wide spectrum of urban development and planning practice experiences, in both the public and private sector.

Amelia believes that equitable mobility drives sustainable, healthy, and liveable cities. She advocates improvement of accessibility, affordability, and equitable distribution of transport movements for everyone, alike. Amelia is passionate about walking, running, and cycling around George Town, Penang.

Ir. Ong Sheng How is a Transport Planner and a Professional Engineer with Practising Certificate registered with the Board of Engineers Malaysia (BEM), and is currently serving as an Ordinary Committee Member in the IEM Penang Branch Executive Committee.

Ong is an avid advocate of sustainable transport, public transport and active mobility, hoping to see active transportation and public transportation as the preferred modes of travel among fellow Malaysians in the near future.
