UBCT Industrial Solutions Sdn Bhd is a leading provider of industrial automation solutions, with a strong focus on smart manufacturing and Industry 4.0 technologies. The company is committed to advancing the adoption of innovative automation and sustainable practices across a wide range of industries, empowering businesses to embrace the future of manufacturing.

With over two decades of experience spanning multiple markets, including international engagements, UBCT has consistently remained at the forefront of industrial automation and smart factory initiatives. Its deep expertise and steadfast commitment to excellence enable the delivery of forward-thinking, reliable technologies that support seamless transitions to Industry 4.0 environments.

Strategically positioned to support major industrial hubs, UBCT plays a pivotal role in shaping smart manufacturing ecosystems. The company leverages IoT-enabled systems and advanced data analytics to transform raw data into actionable insights, driving value across various IoT applications. Recognizing the growing impact of the Internet of Things (IoT), UBCT offers intelligent, scalable solutions—including high-performance storage systems and advanced cognitive computing—integrated with robotic technologies to optimize workflows and enhance operational efficiency.
