Synopsis

Intel Corporation is an American multinational corporation founded in 1968 and it is a semiconductor manufacturer of microprocessors and electronics. Intel is one of the top 10 biggest semiconductors, generating total revenue of 79 billion USD in 2021. Intel latest business strategy announcement for 'IDM 2.0', and new Intel Foundry Services (IFS) business, making Intel to also become a provider of foundry services for semiconductors manufacturing.

Intel's presence in Malaysia started in 1972 as the first offshore site begins with manufacturing facility, and currently covers design & development, IT and other operations, making Intel Malaysia one of the important sites to Intel. In 2021, Intel announces an additional 30 billion MYR investment in building advanced packaging factory in Penang, Malaysia.

Intel offers broad portfolio of products and solution on Data Centers, Computing, AI, 5G, IOT that covers from education, finance services, industrial, retails and other industries.
